## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 4, 7 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Shiota et al. (5,879,970).

Re claim 4, Shiota et al. discloses depositing an epitaxial layer based on Group IV elements a silicon substrate by Chemical Vapor Deposition using source gases (See abstract), and including employing nitrogen as a carrier gas, wherein the epitaxial layer comprises a SiGe epitaxial layer (Abstract and Col.6, lines 15-20).

Re claim 7, Shiota et al. disclose wherein the CVD process is carried out at a temperature that facilitates a CVD growth rate of an epitaxial layer that is substantially greater than a CVD growth rate of such an epitaxial layer using hydrogen as a carrier gas, since the same temperature is being used as the present invention (less than 600 °C).

Re claim 18, Shiota et al. discloses wherein the process is carried out at a temperature of less than about 600°C (see abstract, 350 °C to 450 °C).

***Allowable Subject Matter***

Claims 5 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
